Confidential – eyes only

**Re: BFG April 21<sup>st</sup> Posting**

Following is the analysis done on the new posting today from BFG (attached). This is the first posting that has been done since early March. The following points in bold represent the new leads and any relevant data follows.

*Well Shelly has sent people into to Tom's camp to have them sec checked to find out who the leaks are. Well that has obviously not been working. Chelsea needs a retread on her metering or sec checking or both. Anyway, this is the best part, there are people everywhere that are feeding data to the press, enemies, critics etc.*

Claire Headley would know that Mr. Graves was at CCI related to some Odin personnel situations. Mr. Graves sec checked Lee Anne but don't know if Claire would have known this. However Mr. Graves being at CCI was not a secret i.e. people would have seen her there and some people uplines could have known.

***Yvonne Gonzalez tricked out a Chevy Suburban without a partition that makes it so nothing behind the driver could be seen. How do you think Dave Miscavige was at Tom's house and no one knew?***

Yvonne was visible on national TV on "The Insider" and also on Yahoo news so it wouldn't require special knowledge to assert the above.

*I mean how many other scientologists do you know that had Dave Miscavige come over to their house to welcome their kid into this world.*

The Headley's had their kid in mid February and it's clear it's big deal for them – Marc tried to call Claire's mother (Scn in good standing Gen Whitt) to tell get her to go see it and Gen KR'd the attempt. The Headley's put up a website for the kid with photos and it's a really ugly, sickly looking kid that they are showing off. Could be some resentment expressed.

***Oh yeah, tip to Dave Miscavige and all OSA guys on keeping Dave's security in. Don't have Yvonne (driver slave) go to Tom's house, don't have Emily Jones/Barram (steward slave) go to Tom's house...***

The Emily Jones/Barram would be known to Claire but apparently was not broadly known. Claire would have told Marc.

***Also, you need to keep in better security in at Dave's house right up the street from ASI and at ASI. The OSA guys should know better about the technology of directional mics and audio bugs these days. Oh – yeah better do another sweep for bugs at Dave's place just to be sure.***

The location referred to would be known by Claire (and thus to Marc). It is also known by others (Chuck Beatty mentioned it confidentially in an eyes only conversation in December). We don't really know who else would know. We have not had any indication of any conversations being picked up.

***One of my contacts at one place said that someone gave them a very sensitive video of Tom with Dave. Anyway, Karen Pouw was on that one for about one minute when it was immediately whisked over to Mike Rinder to handle.***

This is the one piece of data that would only be known by a few people. This is a description of the shopping of the 2004 Mr. Cruise Freewinds birthday party video to Tony Coughlan at Inside Edition in Los Angeles. Only Coughlan and his (unknown) associates would know that he spoke briefly with Karin Pouw (note it's spelled wrong in the posting) and that then Mr. Rinder called him back the next day and took over the comm line and maintained it. Coughlan engaged in several conversations with Mr. Rinder and was made aware that the video had to be stolen and that we were very interested in finding out who took it so he probably engaged in conversations directly or indirectly with the culprit and could easily have filled him in on who he had spoken with.

***In terms of the Int base. Berthing is moving ahead at light speed now. They have no choice with the amount of blows and security risks at this point. You can only take the personal staff cars away for so long and make it matter. People can still walk down the street and get past the QM at Kirby. Better yet, they still have staff that live down the road and they could leave whenever they want. Yes, okay so they have camera all over the roads down on Sublet Road, but the guards are not so smart that they see everything. They have been restricting people to the base SO MUCH, that it was like " Can we get the Berthing building finished" so soon they will all be restricted and not even know it – Well until they try to go into town to get something. You are going to need a friggin approved issue to be able to leave the base on your own soon.***

Berthing has been back on as priority cycle since at least early to mid 2004 with major construction crews being brought back in, etc., and this was prior to Marc and Claire blowing. Per the data we have, the amount of visible activity now would actually be less than it was a year ago so the inference that it is moving now at light speed does not provide any leads (unless there is other data or orders that would indicate any truth to the above).

---

There is nothing conclusive in the posting that identifies or excludes Marc Headley or gives us any new leads.

New data was learned on Marc today from Tonie Popovich. She and Kevin had received an email from Marc but after a back and forth comm revealed his disaffection (below) she contacted Kirsten and send the exchange to her. Kevin was r-factored that they are declared and has cut the line.

*"Yeah, Claire and I left there last year and just had to get our lives back. We are doing great and with the baby everything is awesome. We are not really on lines anymore as they did not really like us leaving and all. Oh well. We will leave it at that as you say."*

Marc's email also said he has started a few new companies mainly installing A/V equipment for the entertainment industry, and one of these recent companies is called MODE - Multimedia Operations, Design and Engineering LLC. He doesn't name any other companies. This is being checked into as one means of getting a line established. Also to see if such a company may have done work with Inside Edition.

---

BFG POSTING

PostPosted: Fri Apr 21, 2006 3:15 am    Post subject: [Note] BFG resurfaces!!!

Subject description: Hot off the press!!!

Okay guys, what a crazy past few weeks this has been.

I will tell you how crap the Security of the Base and Tom Cruise's camp is. They are fully infiltrated! I cannot go into details, but Dave Miscavige has had Shelly (his wife and assistant) handling whatever Tom complains to him about. Well Shelly has sent people into to Tom's camp to have them sec checked to find out who the leaks are. Well that has obviously not been working. Chelsea needs a retread on her metering or sec checking or both. Anyway, this is the best part, there are people everywhere that are feeding data to the press, enemies, critics etc. I have one huge project that when it comes off, I will be posting it all over Clambake. It will be the best coup ever! You wait, when it happens, you will wonder how it ever was pulled off. Well I will tell you right now – MONTHS of planning and pure genius execution of detailed plans and plan B's and then two more backup plans.

The big mystery is how Katie got the hospital without anyone knowing. Well that's easy!

Yvonne Gonzalvez tricked out a Chevy Suburban without a partition that makes it so nothing behind the driver could be seen. How do you think Dave Miscavige was at Tom's house and no one knew? Well there you go. Same vehicle – different passengers – solved. Dave Miscavige seems to be taking a very keen interest in Tom and the baby. I mean how many other scientologists do you know that had Dave Miscavige come over to their house to welcome their kid into this world. He probably implanted the kid right then and there about being a Scientologist.

Oh yeah, tip to Dave Miscavige and all OSA guys on keeping Dave's security in. Don't have Yvonne (driver slave) go to Tom's house, don't have Emily Jones/Barram (steward slave) go to Tom's house and certainly don't have Dave (slave driver) go to Tom's house and that would keep it safe that people would not know he was there.

Also, you need to keep in better security in at Dave's house right up the street from ASI and at ASI. The OSA guys should know better about the technology of directional mics and audio bugs these days. Oh – yeah better do another sweep for bugs at Dave's place just to be sure.

The Int Base guys are really freaking out right now on who is leaking what to whom. One of my contacts at one place said that someone gave them a very sensitive video of Tom with Dave. Anyway, Karen Pouw was on that one for about one minute when it was immediately whisked over to Mike Rinder to handle. I guess there was no more ditches for him to dig or he was doing it in between.

Next up is the "Katie escape!" You have heard the jokes and the press is going nuts over the baby. Well there about 20 people that are working on her escape. I kid you not. This is a very delicately balanced maneuver that has people working around the clock. Anyway, keep watching and you will see the whole thing unfold. How the Church and Tom will spin this one, I have no idea. They are going to take a huge hit on this one as no matter what they do, they're are going to look bad when this is all over.

In terms of the Int base. Berthing is moving ahead at light speed now. They have no choice with the amount of blows and security risks at this point. You can only take the personal staff cars away for so long and make it matter. People can still walk down the street and get past the QM at Kirby. Better yet, they still have staff that live down the road and they could leave whenever they want. Yes, okay so they have camera all over the roads down on Sublet Road, but the guards are not so smart that the see everything. They have been restricting people to the base SO MUCH, that it was like " Can we get the Berthing building finished" so soon they will all be restricted and not even know it – Well until they try to go into town to get something. You are going to need a friggin approved issue to be able to leave the base on your own soon.

They are also filtering the mail that is coming in! I am not talking about the personal mail which has been being done for years – I am talking about any bad articles in the tabloid magazines are being

trashed in Dept 2 (Mail Dept) before they even get sorted. I am sure that there were about 50 Rolling Stone mags that nobody ever saw due to that article last month. You have got to dig this, no one on that base below OT 3 has EVER HEARD the [//REDACTED] story. No one! And they want to make sure it stays that way. There are NO TV's in any of the dorms anymore for the odd chance that one of them might watch normal TV on it. It is a total lockdown. And still the leaks are there and the data is still getting in and out through their own people!!!!!! You have got to love the years of torture and miserable life that make these staff start to defect!

Oh and Chuck, yes the place is getting worse. Whoever tells you differently lives in la la land. You were there for years and you think that over that time it got better - no it never gets better there - only worse. It will be that way until they have 50 people left. They did not go down from 1000 staff to 300 staff because it was thriving metropolis! The place sucks and people want to get the hell out and they are! More so than you know. Last count there was about 6 people in PDO. They used to have 50! And those guys are offloading everything they used to do to other units so that can keep up with the designs and stuff that is needed by the A/V dept and Bridge only. They don't do mags anymore, no promo, nothing just designs and CD art.

So next time someone tells you that my posts are exaggerating the scene there at the Int Base, ask yourself how many posts that person has done on the place and if they match up with what you have experienced firsthand or have had confirmed by others.

Anyway, I just wanted you all to know that BFG is still among the living but just very tied up with current activities. As soon as I can I will post some more juicy stories that will make your hair curl. Bye for now.

BFG
