

Penalty: Double the point value is put back on the stat if the attacker returns after previously having been reported as handled.

2. INVEST NETWORK THREATS WITH PENALTIES (GDS).

Reference:

HCO PL 26 Feb 1972R QUALITY CHECKLIST FOR DIVISION 7

HCO PL 12 Mar 1975 Data Series 40, IDEAL ORG

This is the Invest portion of the TOTAL UNHANDLED NETWORK THREATS. It is graphed on an upside down graph (0 at the top). It is the combination of the Invest Threats (unhandled attackers) from the Invest & Handling Branch and CSI Invest Branch (including TMI and squirrels) and the External Security Threats.

Penalty: This stat carries a penalty which escalates as the threat ages. A penalty of .1 is added to the stat for each week that the threat remains unhandled. Thus, the first week the threat appears on the stat it is worth 1 point, the second week 1.1 points, the third week 1.2 points, etc.

Additional Penalty for Marring Incidents: In alignment with the other production Bureaux, an additional penalty is counted on the Unhandled Network Threats stat any week when particular categories of incidents occur. These incidents are of such a black mark against the purpose of the OSA Network that their occurrence warrants a penalty the week they occur, beyond the value of the unhandled threat coming on the stat. These penalties are added to the Unhandled Network Threats stats of the Bureau or Bureaux responsible and included in the total Unhandled Network Threats Stat for the office concerned (DSA/Cont/OSA Int). This means that a marring incident for which more than one Bureau is responsible is counted for each bureau responsible and included in the overall total for that office. Those that apply to Invest are counted when

an attacker instigates or conducts a new attack that week as follows:

Local picket (Org level) 20 points

Significant picket (such as of an Int Management entity) 100 points

Regional level negative media or PR attack 20 points

National level negative media Or PR attack 40 points

International level negative media or PR attack 100 points

Local suit filed 20 points
(local rent/creditor suit, local temporary eviction, refund suit when prompted by an attacker)

Local suit lost (as defined above) 20 points

Significant suit filed (any case naming an Int level Scientology principal or Corporation in addition to the local church, criminal case, large civil damages suit, loss of religious status) 100 points

Significant suit lost 100 points

A local attack (such as by a government agency) when prompted by an attacker. 20 points

A national level attack (such as by a government agency) prompted by an attacker 40 points

An international level attack (such as by a government agency) prompted by an attacker 100 points

Raid conducted against a Church or Mission 100 points

OSA Cont offices count the cumulative value of all DSA level penalties. OSA Int counts the cumulative level of all Cont penalties. This penalty is not cumulative week to week; it only comes on the week that the marring incident occurred.

DATA CHIEF

STATISTICS:

1. REPORTS TO MANAGEMENT

References:

- OSA NW ORDER 42 INTELLIGENCE, ITS ROLE
- OSA NW ORDER 35 ESTIMATIONS AND PREDICTIONS
- BOOK: HOW TO LIVE THROUGH AN EXECUTIVE, CHAPTER 8

THIS STAT IS COUNTED BASED ON THE FOLLOWING POINT SYSTEM:

Audio/Video product exchanged	1 point
Alert issued	2 points
Debrief/report/request summarized and routed	2 points
Data pack produced	5 points
Press checks, update/summaries done and routed	8 points
Analysis or Pre-estimate produced	10 points
Charts/Maps/Graphics produced and displayed	10 points
Posted CIC	10 points
Estimate	20 points
Approved Eval	35 points

To be counted, the product must be exchanged outside the Branch or with other management units or command.

2. THREATS PREDICTED

CSI I.P. INFRINGEMENT INVEST I/C

STATISTICS:

1. TOTAL # OF INTELLECTUAL PROPERTIES INFRINGERS, WITH PENALTY.

This is a guard stat that measures the total number of intellectual properties infringers unhandled with a penalty for infringers that remain unhandled after a specific TM is set. TMs are set the first week when a new situation is found. If the TM is not met, at the end of that week one penalty point gets added and so on every week until the infringer is handled — at that time the total points accumulated for that infringer are taken off

the stat. The types of infringers counted on this stat are: 1) Infringers of the Upper Level materials; 2) any infringers of marks owned by RTC and ABLE and Int level organizations; 3) Copyright infringers of LRH and COB pictures.
